Plenary Session: Transformation, security, investment.

What changes and in which areas are necessary to accelerate the transformation of the Polish energy sector? Key investments and programmes: the conditions that must be met to enable their implementation. Energy policy and cornerstone documents for the sector (KPEiK, PEP): a new perspective and clearly defined directions. How to transform the sector in an era of geopolitical turbulence, constant change and uncertainty? Energy security, supply stability, sovereignty and independence – the key criteria for rational changes in the energy and fuel sector. How do the plans of Poland's largest energy companies align with these priorities? How can the energy sector be transformed without degrading competitiveness or prompting relocation of industry due to rising operational costs in Europe?

Opening:

- **Wojciech Kuśpik**, President of the Management Board, Grupa PTWP S.A.
- **Marcin Krupa**, Mayor of Katowice
- **Wojciech Saługa**, Marshal of the Silesian Voivodeship
-

Speech:

- **Miłosz Motyka**, Minister of Energy, Poland

Heating in the face of challenges.

System heat in Poland: the state, resources and condition of the sector, the structure of ownership, its role in Poland's social life and economy, necessary investments and upgrades. Current and assumed regulatory conditions of the heating sector transition – what key legal acts (both domestic and EU) define the possibilities of investors and managers of the sources and infrastructure. Directions for the decarbonisation of heating in the context of ongoing and planned investments. Time, costs, public aid, new legal solutions – key determinants of the transition of the sector towards efficiency and carbon neutrality.

What about hydrogen?

Fuel of the future or an expensive illusion? Cost-benefit analysis of building a hydrogen economy based on experience in Poland and across Europe. Technologies, investments, infrastructure. Market, price, support mechanisms. Renewable hydrogen in hard-to-decarbonise sectors and as a fuel for Europe's energy independence. Realistic development forecasts for the industry in the medium and long term. Major barriers. The role of hydrogen in the transformation of the energy and fuel sectors, and its future place in the economy.

The discussion, which were invited to participate (alphabetic order):

- **Magdalena Jarkulisz**, Director, Department of Electric Mobility, Fuels and Hydrogen Management, Ministry of Economy, Poland
- **Grzegorz Józwiak**, Director, Hydrogen and Synthetic Fuels, Orlen SA
- **Anna Kornecka**, President of the Management Board, Hydro Sanok Sp. z o.o.
- **Agnieszka Ozga**, Director, Department of Energy Transition, Gaz-System SA

Human resources for the new energy sector.

Staffing needs and competency gaps in a rapidly evolving energy industry. Education – the role of universities and energy sector employers. Reskilling and upskilling of workforce, competency assessments of employees in operating (and transitioning) companies. Barriers – finances or lack of awareness? How to assess existing and future (long-term) employee and management competencies? Foreign investors in major transformational projects – a source of know-how and a testing ground for new experiences.

The discussion, which were invited to participate (alphabetic order):

- **Marcin Biernat**, Deputy Director, Provincial Employment Office in Katowice
- **Tomasz Bury**, Director, Nuclear Technics Laboratory, Silesian University of Technology
- **Daniel Kiełpiński**, EVET expert, National Team of Experts on Vocational Education and Training

Local transformation.

Readiness of local governments to take partial responsibility for the country's energy security – declarations and facts. Investments related to RES installations carried out by energy communities with state support. Involvement of communities and local entrepreneurship from the outset – grassroots initiatives. The role of the prosumer: benefits, challenges, and dialogue between the prosumer segment and the operator/regulator. Energy sources in a distributed model – advantages and disadvantages of decentralisation. Clusters and cooperatives – is local balancing an opportunity for Poland's transformation? Urban photovoltaic farms. Geothermal energy – potential and completed projects. Zero-emission heat at an acceptable price: cooperation between local governments and the district heating sector.

The discussion, which were invited to participate (alphabetic order):

- **Magdalena Bezulska**, President of the Management Board, Director General, Veolia term

Energy storage.

Large-scale energy storage – conditions for market development. Interest from distributors, prosumers, and energy-intensive industries. The intended role of the storage segment – a solution for effective system management in the face of limited flexibility. Compatibility with renewable and conventional energy sources. The regulatory environment for energy storage – capacity market, energy market, and potential remuneration for flexibility services. Energy storage – construction (subsidies?) and maintenance costs versus final energy prices. Developing energy storage capabilities in the context of cybersecurity and the resilience of critical power infrastructure to crises and hostile actions.

The discussion, which were invited to participate (alphabetic order):

- **Barbara Adamska**, President of the Management Board, Polish Energy Storage Association
